

IN THE SPECIFICATION

Please substitute paragraph [0016] on page 7, with the following paragraph..

[0016] A method, apparatus, and system exist to generate a ranked list of one or more related documents and a link to each of the one or more related documents. The one or more related documents are ranked based upon relevance to the first representation of content associated with one or more specified fields of the reference extensible markup language document.

IN THE CLAIMS

Presented below are the amended claims in a clean, unmarked format.

*SUB B17* 1. (Amended) A method, comprising:

*A2* generating a list of one or more related documents ranked based upon relevance to a first representation of content associated with a first field of a reference extensible markup language document, the first representation including a set of terms and one or more weighted values associated with each term in the set of terms; and generating a link to each of the one or more related documents.

*SUB B37* 27. (Amended) An article of manufacture being one or more machine-readable media

*A3* that store instructions, which when executed by a machine, cause the machine to perform operations comprising:

*Cm.t* generating a list of one or more related documents ranked based upon relevance to a first representation of content associated with a first field of a reference extensible
